*A note about OBGYNs in France: Like many other countries, OBGYNs are in high demand and appointments are often scheduled three months out. That being said, if you are looking for birth control prescriptions, suspect infection, and/or would like to get a pap smear, many general physicians are able to prescribe and perform those procedures. It would be best to ask when making your appointment. Another option is the OBGYN emergency located at the Maison Blanche hospital in Reims. No appointment is necessary and you can be seen the same day.
